

Mahmoud Hachem

Software Engineering Manager
Beirut, Lebanon - +96171244839
mahmoudhachem.d@gmail.com | Linkedin | Github

Summary

Software Engineering Manager with **12 years** of experience leading teams and delivering **large-scale, full-stack distributed systems** in healthcare and enterprise environments. Strong background in **system design, architecture modernization, and growing engineers** in regulated, high-availability contexts. I care about building reliable platforms, keeping standards high, and using automation/AI to help teams ship better and faster.

Employment History

Software Engineering Team Lead at Cardinal Health, El Zalka

April 2025 — Present

- Lead a team of **4 engineers** modernizing platform architecture to improve performance, scalability, and long-term maintainability.
- Introduced **Backend-for-Frontend (BFF)** and **Gateway** patterns to reduce coupling and make service ownership and independent delivery easier.
- Migrated our **self-managed Kafka platform** to **Confluent Cloud**, improving reliability and data governance while reducing operational costs by **~65% yearly**.
- Support growth through regular **1:1s** and structured development conversations (OTTT/SMART), plus hands-on reviews and collaboration.

Staff Software Engineer at Cardinal Health, El Zalka

January 2020 — April 2025

- Helped shape and deliver the foundation of a **next-generation, event-driven reporting platform** powering mission-critical systems used by **thousands of U.S. hospitals**.
- Built reusable Event driven architecture with **Kafka, Kafka Streams, Kafka Connect, and Elasticsearch**, enabling teams to deliver streaming services efficiently.
- Drove the move from legacy monoliths to a **service-based architecture** with **Java and Spring Boot**, improving scalability, resilience, and delivery speed.
- Acted as a technical leader through architecture guidance and mentoring, while raising the bar on **code quality, testing, and CI/CD**.

Senior Software Engineer at Sword Group, Beirut

June 2016 — December 2019

- Worked closely with major Swiss clients as a trusted engineer/consultant, delivering production outcomes in complex enterprise environments.
- Supported the transition from **monolith to microservices**, integrating third-party APIs and improving logistics workflows for **LeShop.ch**.
- Contributed as a **full-stack engineer** in an international Scrum team, strengthening delivery quality through automation, reviews, and predictable execution.
- Built and maintained security-critical software enabling **digitally signed customs communication** for **SGS TransitNet**.

Full Stack Software Developer at Voicelynx Inc, Beirut

March 2014 — May 2016

- Engineered solutions for real-time call management, concurrency handling, billing systems, and account management portals serving 30+ telecom shops.
- Developed, deployed, and maintained web and mobile applications (Android & iOS) with a focus on real-time performance.
- Optimized performance through SQL scripting, stored procedures, and troubleshooting/remediation of web application issues.

Education

Master of Business Computer, Lebanese University, Beirut, Beirut
November 2016 — November 2018

Bachelor of Business Computer, Lebanese University, Beirut, Beirut
November 2010 — June 2013

Skills

- **Leadership & Delivery:** Team leadership, mentoring/coaching, collaboration, conflict mediation, goal setting (SMART), Agile/Scrum
- **Architecture & Systems:** Distributed systems, event-driven architecture, microservices, BFF, API Gateway, C4 model, **SOA/SOAP**
- **Backend & Data:** Java, Spring Boot, Kafka, Kafka Streams, Kafka Connect, Elasticsearch, Apache Flink
- **Quality & Dev Practices:** CI/CD, automated testing, code reviews
